

FILCHEM™

AN ADVANCE FILTRATION SOLUTION

Prevents bacterial growth and channeling in the filter bed

Filters particles down to 1 micron without flocculation

Delivers stable filtration performance and outlasts all other filter media

Offers substantial energy, water and chemical savings

Grade 1
0.6 - 1.2 mm

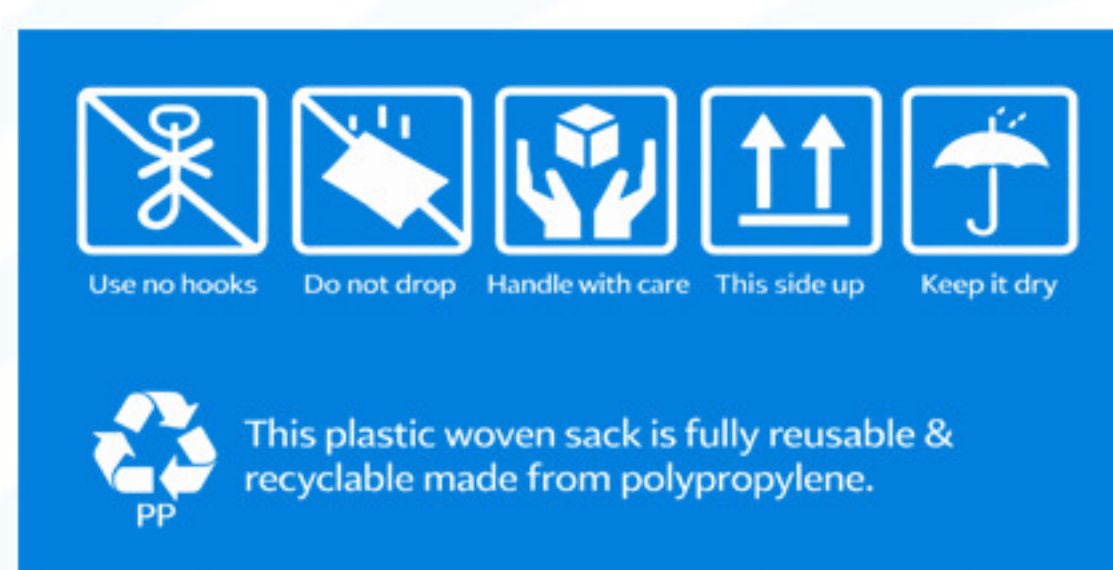

Lasts upto 3-5 times longer than silica

Improved flowrate as there is no channelling

Grade 2
1.7 - 2.4 mm

Grade 3
2.4 - 4 mm
